## Model Costing of Surgical Packages Under RBSK

This section outlines the Model costs of surgical packages under RBSK to be used as a reference by the states. A surgical package includes the cost of all pre-operative investigations, cost of surgery, cost of post-operative care including hospital stay and follow up care. (Any additional stay in case of undue and unforeseen complications may be included separately provided proper justification has been made)

\* The following additional instructions apply for cardiac surgery (Congenital Heart Disease and Rheumatic Heart Disease):

S. No	Health Condition	Disease	Surgical Procedure	ICD-9 Procedure Code	RBSK Procedure Code	RBSK Model costing (Rupees)	Pre-operative Investigations	Post-operative Evidence
-------	------------------	---------	--------------------	----------------------	---------------------	-----------------------------	------------------------------	-------------------------

- 1 Procedures on neonates (0-1 month age) will have additional package costs of Rs. 30,000/- besides costs stated above to account for longer ICU/hospital stay, except where already mentioned in the package.
- 2 Cardiac procedures on infants (1month-1 year) will have additional package costs of Rs. 20,000/- besides costs stated above to account for longer ICU/hospital stay, except where already included in the package.
- 3 In general, all cyanotic cases should be operated. Silent PDAs, small shunt lesions and mild valve obstructions should not be operated.
- 4 However, all cardiac procedures will be routed through RBSK identified specialists for preauthorization/preoperative approvals.
- 5 Refer to Guidelines on Indications and Timing of Interventions for Congenital Heart Disease under Section 5.8. These are to be followed in letter and spirit under RBSK.
